Speaker

Stephen Chia, Chair/Trainer
Ex-Regional Director &
Council Member of NEM.io Foundation

The creation of Bitcoin in January 2009 not only created the new asset class of cryptocurrencies, but also began the era of blockchain technology. 12 years on, blockchain evolved to become one of the fundamental core technologies that is slated to change the world & how we do business.

Today, it is changing the way systems & platforms are created to build trust, transparency and reduce costs in financial markets and beyond.

- Blockchain – What makes it such compelling core technology?
- Significant milestones, impact & implications of blockchain today.
- Birth of cryptos, myths & digital assets as an increasingly important asset class
- Blockchain applications & its impact on businesses today
- How can leaders capitalize on blockchain & digital assets.
