This session takes you behind the scenes of the monetary policy process at Bank Negara Malaysia (BNM). Join us to unpack how the Monetary Policy Committee (MPC) forms its views on the evolving economic outlook and makes its decision – combining hard data, analytical tools and insights from engagements with businesses, households, financial institutions and market participants – and how these are communicated through the Monetary Policy Statement (MPS). The talk will be delivered by BNM Deputy Director, Mohd Helmi Ramlee.

BNM’s Monetary Policymaking and the Role of On-the-Ground Insights

Mohd Helmi is a Deputy Director in the Monetary Policy Department at Bank Negara Malaysia, leading the Balance of Payments, Exchange Rate and Markets Section, as well as the Research and Modelling Unit. Mohd Helmi joined Bank Negara Malaysia in 2006 and holds an MSc in Financial Economics from Universiti Putra Malaysia.
